Subject: Public comment on Microsoft Antitrust Settlement

Who continues to throw coals on the Justice Department's Anti- Trust Suit? Microsoft's two major competitors...not the general public! The public, in whose interest the Justice Department orig-inally sought redress, has not been wronged...rather they have been helped. The investing public has suffered enough: with the decrease in Microsoft's share price and the subsequest fall of the market! Let it go...stop torturing this creative giant because it is so successful. Move on...in the interest of the public!
